Art Kane's photographs of 60s music greats – in pictures

During the 1960s and 1970s, Art Kane made his name photographing rock stars, fashion and everyday life in America, notably the shot *A Great Day in Harlem*. Kane's musician son, Jonathan, has collected a selection of images in a book, published by Reel Art Press. "Art Kane was a pioneer of conceptual photography, of using a wide-angle lens, of saturated colours when his contemporaries were very much using black and white," Jonathan says. "He was the most rock'n'roll out of a group of elite postwar photographers. He was constantly looking to push the boundaries of his work." The images will be exhibited at Snap Galleries in London from Thursday

All these images are courtesy of Art Kane Archive & Reel Art Press
